ARISTOCRAT RANCHETTE WATER PROJECT

2021 WATER SYSTEM OF THE YEAR

Dateline: Fort Lupton CO 5/13/2022 — On May 4, 2022, Administrator Brian Filkowski, on behalf of Aristocrat Ranchette Water Project, accepted the **2021 Water System of the Year** award while attending the 41st Colorado Rural Water Conference & Exhibition in Loveland Colorado.

The distribution water system, located northeast of Fort Lupton, serves 462 residences in Aristocrat Ranchettes with treated water obtained from Northern Colorado Water Conservancy District, piped in by Central Weld County Water District. The system has gone through considerable reorganization and is currently undergoing a complete system rehabilitation with funds obtained through the USDA loan and grant program. The system has recently completed the required CDPHE Sanitary Survey and has been recognized by CDPHE for its successful Lead & Copper Monitoring program.

The future looks bright for this small water utility.
