

Aristocrat Ranchette Water Project, Inc.

Arwp, Inc. Rate Increase 2024

With work on the pumphouse, tank and water service expansion project about to commence, USDA funding requirements are dictating that a rate increase be implemented prior to the project completion.

This rate increase will increase the base rate to \$83.00 per month and will also increase the usage rate to .008 cents per gallon. This increase is most likely a part of other increases required for the future. We will be adding additional tap accounts in the hope that additional increases can be minimized in the future. The rate increase will be effective for the August billing mail out or July usage.

In addition to the obligation of bringing our infrastructure up to date, ARWP, Inc. is faced with new regulations being imposed by the EPA on a Federal level, and CDPHE on a state level regarding the new Lead & Copper service line identification/replacement.
